Junior Software Developer with a strong interest in building reliable, maintainable web applications. Experienced in developing user interfaces with modern JavaScript frameworks and supporting backend services using Node.js-based technologies. Background in cloud platforms, security fundamentals, and version control, with a disciplined and detail-oriented approach to software development. Comfortable working remotely, learning new systems quickly, and contributing to existing codebases.

Education

North-West University - BSc Computer Science and Electronics (Final Year Incomplete)

Matric / Grade 12 - Completed

Relevant Technical Skills

- JavaScript, React, TypeScript, Java, Node.js
- Cloud: AWS, Microsoft Azure, Oracle
- Programming & Scripting: Python, Bash
- Version Control & DevOps: GitHub, CI/CD, Git
- Web & Frontend: HTML, CSS, REST API
- Operating Systems: Linux, Windows
- Data & Databases: PostgreSQL,

CERTIFICATIONS

- Microsoft Azure Administrator Associate (AZ-104)

- Oracle Cloud Infrastructure Multicloud Architect Professional

- Fortinet Certified Cybersecurity Associate

- FortiGate 7.6 Operator – Fortinet

- Cisco Introduction to Cybersecurity

- Cisco Network Addressing & Troubleshooting

- Cisco Computer Hardware Basics

- GitHub Foundations

PRACTICAL EXPERIENCE

- Developed frontend and backend components for small web applications

- Integrated APIs with React-based interfaces

- Used GitHub for version control and collaboration

- Applied secure coding and clean architecture principles
