PROFESSIONAL SUMMARY

Motivated Junior Software Developer with hands-on experience in modern web development using Python, React, and JavaScript. Proven ability to build reliable, maintainable applications with strong foundations in cloud platforms (AWS, Azure), SQL databases, and agile development practices. Certified in Azure fundamentals and administration with additional expertise in cybersecurity and multicloud architecture. Eager to contribute to team success while expanding technical skills in a collaborative, scrum-based environment.

TECHNICAL SKILLS

Programming Languages & Frameworks: JavaScript, TypeScript, React, Node.js, Java, Python

Web Technologies: HTML, CSS, REST API, Angular (familiar), Modern Web Development

Cloud Platforms: AWS, Microsoft Azure, Oracle Cloud Infrastructure

Databases: SQL, PostgreSQL

Infrastructure as Code: Terraform, Azure Resource Manager

Networking & Security: Azure Networking, IAM, NSGs, Cloud Security Best Practices

Development Tools & Practices: Git, GitHub, CI/CD, Agile/Scrum Methodologies, Version Control

Operating Systems: Linux, Windows

EDUCATION

BSc Computer Science and Electronics (Final Year Incomplete)

North-West University | 2025

South Africa

Relevant coursework: Software Engineering, Data Structures & Algorithms, Database Management, Computer Networks

Matric / Grade 12

Lugebhuta Highschool | 2016

South Africa

PROFESSIONAL CERTIFICATIONS

- Microsoft Certified: Azure Administrator Associate
- Microsoft Certified: Azure Fundamentals
- Oracle Cloud Infrastructure Multicloud Architect Professional
- Microsoft Certified: Azure Security Engineer Associate (Exam Scheduled)
- Microsoft Certified: Azure AI Engineer Associate (Exam Scheduled)
- GitHub Foundations
- Fortinet Certified Cybersecurity Associate
- FortiGate 7.6 Operator – Fortinet
- Cisco: Introduction to Cybersecurity
- Cisco: Network Addressing & Troubleshooting
- Cisco: Computer Hardware Basics

RELEVANT EXPERIENCE & PROJECTS

Projects

Full-Stack Portfolio Project | sakhile.dev

- Designed and engineered a responsive portfolio site using React, Vite, JavaScript and Node.js (runtime for tooling and possible backend)
- Architected a CI/CD pipeline via Netlify, automating the build and deployment process directly from a GitHub repository to ensure 100% uptime during updates
- Configured Netlify security headers and automated SSL/TLS certification management to ensure secure, encrypted traffic (HTTPS) by default.
- Developed full-stack web applications using React for frontend interfaces and Node.js for backend services, implementing RESTful APIs and integrating with databases
- Built responsive user interfaces with modern JavaScript frameworks (React, TypeScript) following component-based architecture and best practices
- Implemented version control workflows using Git and GitHub for code collaboration, including branch management, pull requests, and code reviews
- Applied secure coding principles and clean architecture patterns to ensure maintainable, scalable codebases
- Deployed and managed applications on cloud platforms (AWS, Azure) utilizing serverless architectures and cost-effective solutions
- Debugged and troubleshooted software issues using systematic problem-solving approaches and developer tools
- Worked with SQL databases including PostgreSQL for data storage, querying, and optimization

KEY COMPETENCIES

- Strong foundation in Python, Java, SQL, and modern web technologies (React, Angular, JavaScript)
- Familiar with agile development methodologies and collaborative team environments
- Quick learner with ability to absorb feedback and continuously improve technical skills
- Experience with cloud-native architectures and serverless computing (AWS, Azure)
- Effective communicator comfortable asking questions and contributing to collaborative problem-solving
- Detail-oriented approach to writing clean, maintainable code and following best practices
